

Junebug

fun and funky indie rock from the Twin Cities

Junebug Releases Third Studio Album *Beards* on Student Run Records

Twin Cities band Junebug has released their newest studio album, *Beards*, which is available now at local Twin Cities record stores and most major online retailers. This latest release is the group's third studio album following *Share* (2008) and *Modern Day Fairy Tales* (2010). *Beards* is Junebug's first album with indie label Student Run Records in Minneapolis, featuring the work of three producers: Dik Shopteau, Eddie Ciletti, and Brian Jacoby [*Soul Asylum*, *Solid Gold*, *Neil Diamond*]. The album explores some of the band members' roots and influences in classic rock, while staying true to their own signature sounds.

The four-piece Junebug, which describes itself as "fun and funky indie rock" continues to gain traction in the Twin Cities music scene with radio airplay on Radio K, KFAI, and Cities 97. They have made numerous local television appearances and actively play live shows around the region. Notably, Junebug has performed at the Basilica Block Party in Minneapolis and is a recurring favorite at the annual Twin Cities Pride Festival. They have performed with such acts as Solid Gold, Heatbox, Mayda, Jon Wayne & the Pain, the Jayhawks and the Black Crowes.

Following the March 12 release of *Beards*, Junebug is set to perform a busy summer schedule consisting of numerous shows, appearances and events in the upper Midwest. The group shows no sign of slowing down as they promote *Beards*. They continue to work out new material for upcoming albums already in the planning stages.
